

## Corrigendum to: Loss of monoacylglycerol O-acyltransferase 2 can be compensated for by diacylglycerol O-acyltransferases 1 and 2 resulting in a negligible influence on mammary cancer development found in a mouse model and verified in human tissues

Received 13 October 2025, Accepted 23 October 2025, Published online 24 November 2025

In paragraph “TCGA analysis” of the “Methods” section, the text “The correlation analysis between MOGAT2 and DGAT1/2 were generated by using “Correlation” function in GEPIA2 [这句话没看懂].” was incorrect. This should have read: “Correlation analysis between *MOGAT2* and *DGAT1/DGAT2* was performed using the “Correlation Analysis” module in GEPIA2.”
